In any sums, \$100, \$500, \$1,000, \$10,000.

We have secured from the Company the privilege of seling \$25,000 of the above bonds, and we now offer them for \$103 and interest from April 1 to date of saie.

The capital stock of the Hygienic Ice Company amounts to \$50,000, and the plant, now nearing completion and to be in full operation by May 15, cannot be duplicated for \$250,000.

The deed of trust given to secure the bonds covers the entire plant of the Company. The bonds are payable twenty years from January 1, 1890, and will be issued only as the work of construction progresses. bonds are payable twenty years from January 1, 1890, and will be issued only as the work of construction progresses.

The Company owns by purchase the famous Federal Springs, a mile and a half east of the Capitol, being the largest within the District of Columbis, from which there is the enormous output of over 800 gallons a minute. These springs have long been famous for the purity and sweetness of the water therefrom. Because of the behenomenal coldness of the water (54 degrees F.) the task will be greatly reduced, and for this reason the daily work of freezing can be carried on more easily and more economically than by any future competing plant, which will be compelled to use river or other water of a higher temperature.

The buildings have been erected to accommodate a duplicate plant of machinery so that an output of 240 tons a day can be secured at a very low additional cost. This duplicate plant may be put in this season to meet the unexpectedly large demand already apparent for the Hysienic rec, thereby adding to the security of these bonds.

These bonds will be registered by the Washington Loan and Trust Company. The interest at 6 percent will be paid quarterly on the first days of January, April, July and October, by check of the treasurer mailed to the holders of the bonds, as is done with the interest checks of the bonds of the Washington Market Company. They will be issued in multiples of \$100 at the option of the purchaser.

For these reasons the b. nds will prove a very desirable investment and command a large premium—making a profitable as well as a safe investment.

To those first applying the limited number of bonds at our disposal will be first sold.

Very truly.

Many of the best estates in the siderable depth. It is believed that precautions from the break will strike right across Lake Bolivar, which is now rising rapidly, some say at the rate of four inches an hour. The bustling little town of Bolivar, near by, will probably be partially overflowed, although it

stands on high ground.

Every effort is being made to close the gap, which is, however, said to be widening. The river here at Rosedale is falling steadily and all other levees are holding well.
